

DISCO Pricing

Simple and transparent, we make invoicing predictable

“DISCO’s pricing model is a major plus — it allows our firm to use it for any size case, big or small.”

— Daniel Cragg, Eckland & Blando LLP

“The cost savings associated with DISCO are undeniable, and the product’s ease of use and service have been exceptional.”

— Jason Nittel, Allen Matkins Leck
Gamble Mallory & Natsis LLP

Pricing you can count on

Trying to set an ediscovery budget for any case can strike fear in the bravest of attorneys. Hidden fees are tucked into almost all aspects of the business, including charges for data collection, transfer, processing, data expansion, user licenses, hosting fees, analytic add-ons, review, and productions. The impact of data expansion alone creates cost that often isn’t anticipated and leads to unpredictable costs.

Unlike other ediscovery software, DISCO’s flat-rate per gig pricing model eliminates surprises and allows for predictability and better budget planning. Your cost is based on the the top level, parent file data size before ingestion — ensuring predictable pricing for the life of the case. Powerful early data assessment tools give you control to filter, organize and delete non-relevant data. Unlimited user licenses enable you to scale up and down as needed throughout your case. The end results takes the guesswork out of your invoice, at the same time providing world-class software as a service.

DISCO combines world-class engineering with a deep love and respect for the law to deliver the best legal technology.

Flat-rate pricing with no hidden fees

Since our pricing model is calculated based on the volume of pre-ingested data, you have immediate insight into your monthly charge before the first file is loaded into DISCO — unlike our competitors who first unpack your data, process it, then charge you processing fees and hosting fees on the larger processed size of the data. We do not charge on the larger processed size of your data, for production images, or other work product that might arise over the course of your case.

Transparent and predictable invoices

With DISCO you don't pay additional costs for things like collection and transfer, user licenses, processing or productions. Where other vendors often charge extra for early case assessment or analytic features, these and other features like email threading, search visualization, and advanced AI are included with every DISCO database. Whether you choose our matter-based transactional pricing or one of our yearly subscription models, you get unlimited access to all the capabilities of the product.

Cost savings throughout the review process

Cost savings in DISCO magnify even further when considering the time that reviewers actually spend in the database reviewing documents. DISCO has the professional expertise to help when you need an extra set of hands. Our full-time, in-house team of industry experts can tackle single tasks or manage the entire ediscovery process for you. With one contract, one invoice, and one price, our dedicated staff of legal and ediscovery professionals is ready to ensure you have the answers you need and the resources necessary to ensure you stay informed and in control of the process.
